Bennington Water/Sewer Commissioner's Meeting

June 10, 2025

Meeting Minutes

Present: Jon Charlonne, Dennis McKenney & Melissa M. Clark

Dennis opened the meeting @ 16:00.

Dennis stated that he had delivered a copy of the sidewalk plans to Matt Miller for the connector replacement plan. Route 47 is done. Dennis is going to contact Margaret Blank at Underwood about deadlines – supposedly something was done in the fall and there was a certification letter. Matt stated that he cannot help with it. Any lead or galvanized lines need to be changed on both sides of the curb stops in the next 10 years. We need to see about finding a contractor to change out so many each year to be compliant.

It was discussed about turning off meters for those that have not yet upgraded. It was decided it should be run by the Selectmen as well as Town Counsel. After getting approval, a certified letter would be sent to those customers. We will review rules for shut offs in procedures.

A quote was presented to swap out the meter panel at the pump house for $1,400. There is enough in the budget to cover cost so it was voted to proceed with this.

Well house painting has been completed in Patriot Blue.

Meeting minutes were approved

Adjourned @ 16:10

Respectfully submitted

Melissa M. Clark
